# I INTRODUCTION TO LINUX

In this chapter you are about to learn about three major family Linux distributions, which are:

1. Red Hat Family Systems (Fedora, CentOS)
2. SUSE Family Systems (openSUSE)
3. Debian Family Systems (Ubuntu, Linux Mint)

Due to user's need the amount of distributions will constantly grow as long as they can develop special configurations to respond to these needs.

## I.1 RED HAT FAMILY SYSTEMS

**Red Hat Enterprise Linux** or **RHEL** is the family that includes CentOS and Oracle Linux Fedora. Last one is significantly more software than RHEL because of community involved in building Fedora.
